

RESNA AT-1 Section 4

The following colors may be used for the RESNA AT-1 Section 4 labeling symbols according to the guidance specified in Section 7 and Annex D of the AT-1 Section 4 Standard. All colors specified should provide a minimum of 80% luminance contrast (per ASTM F3022 7.3 Color Value Contrast - Color Value Measurement Method) against Black 3 C, except for 3517 C which is designated for contrast with white.

Symbol diameter should be no less than 0.5 inches or 13 mm; larger sizes are encouraged. The following symbols may be resized.
